- Hungarian
- English
- German

HOBBIES

- Mountaineering
- Photography
- Climbing
- Triathlon

SOFTWARE AND WEB DEVELOPER

My Bachelor in Software Development prepared me for finding the most suitable and up-to-date solution to any technical problem.

I believe that quality software is the product of well-thought-out architectural design as well as meticulous implementation.
My passion for ensuring these two will help any team to deliver scalable and maintainable end products.

WORK
